SERGIY GARKUSHA

FRONT-END DEVELOPER

ABOUT ME

I'm a front-end developer who has a results-focused attitude to creating SPA, using React(JS/TS), Redux. Now I am improving my skills in this direction. In my free time I solve problems on Codewars, and becoming familiar with NodeJS. I also plan to raise my level of English to Intermediate. In the future, I see myself as a Full Stack Developer I would like to find project work and fulltime employment in a company with a modern approach to development and a collaborative team. Open to your suggestions
